JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

half of the street or alley such garbage, ashes, or rubbish is permitted to lie for 24 hours.

6. Any and every person failing to perform the duties required of him, or to comply with the provisions of this section, shall for every offense, upon conviction, be subject to a fine of not less than \$10 nor more than \$100, and each day's continuance of any such nuisance or condition mentioned herein shall be a separate offense.

Sewers—Connection with, Required. (Ord. 149, July 9, 1913.)

SEC. 8. *Sewage*.—1. Every building situated on any street in the city of Lexington where there is a public sanitary sewer shall be connected with said sewer in accordance with the ordinances of the city governing such connection, so that all sewage from the premises shall empty into the sewer, provided that such building is used, or intended to be used, as a dwelling or in which persons are employed, or intended to be employed, in any manufacture, trade, or business. It is hereby made the duty of each owner of any such building to cause the same to be connected with any public sewer already constructed as herein provided within 90 days after the passage of this ordinance, and hereafter within 90 days after a public sewer is constructed and available for use; and it is hereby made unlawful for any person to occupy or use any such building for any of the purposes above mentioned after the expiration of such 90 days unless the building is connected with the sewer as herein provided.

2. It shall be the duty of the health officer to notify in writing the owner or controller and the tenants or occupants of every building required by this section to be connected with the public sewer, and to so connect such buildings, but a failure of the health officer to give such notice shall in no case relieve any such owner, tenant, or occupant of the penalty prescribed in this section.

3. Any person who shall violate subsection 1 of this section or fail to comply with the requirements thereof shall upon conviction be fined not less than \$10 nor more than \$100 for each offense, and each day's continuance of such violation shall be deemed a separate offense.

Privies and Cesspools—Construction, Care, and Disposal of Contents. (Ord. 149, July 9, 1913.)

SEC. 9. *Privies and night soil*.—1. In those parts of the city not provided with sewer and water main privy vaults shall be constructed, and the construction of privy vaults and cesspools will be permitted only on premises where city water and sewer are not accessible.

2. The construction of privy vaults shall conform to the following specifications unless of equally efficient and water-tight construction which may be approved as such by the health officer.

They shall be 5 feet deep and made of either brick or concrete. The walls of such vaults, if made of brick, shall be of well-burned brick not less than 4 inches thick (one brick thick), laid in standard water-tight cement mortar, and the inside with a half-inch coat of Portland or hydraulic cement mortar, in proportion of 1 part Portland cement and 2 parts clean, sharp sand. After this coating is put on it shall be given a one-coat wash of such cement. The bottom shall be at least one brick thick, laid in such cement mortar, or of such cement concrete 6 inches thick.

3. When Portland or hydraulic cement concrete is used to construct vaults, the walls shall be at least 4 inches thick, laid to form, and the concrete shall be made 1 part live Portland or hydraulic cement, 3 parts clean, sharp sand, and 5 parts crushed stone, free from dust, and of sizes between one-quarter and 1½ inches in largest diameter, and shall be plastered and grouted inside and out as prescribed above for brick construction.

4. Vaults shall be made water-tight and their walls continued 12 inches above the ground surface to prevent surface drainage. No retempered cement shall be used.
